

ISF CHARITY CLASSIC

The Isabella Santos Foundation (ISF) is committed to investing in rare pediatric cancer research and treatment options to increase survival rates across the world.

Since 2007, ISF has funded **over \$8M** toward rare cancer research and treatment at Levine Children's Hospital in Charlotte, NC, benefiting **thousands of families** along the way.

In 2024, they're taking their mission to the next level by expanding across the Carolinas and offering various ways to join the effort.

The Annual ISF Charity Classic: Birdies, Bourbon & Beer offers the perfect opportunity to get your business involved.

ISABELLA SANTOS
FOUNDATION

Beat Cancer. Grow Hair. Live My Dreams.

WHY ISF?

Isabella fought neuroblastoma, a form of rare cancer, for five years and ran out of treatment options. This is the case for many other children diagnosed with rare cancers. Pediatric cancer is not just one disease – it is made up of 12 major types and over 100 subtypes so it falls into its own category with little to no funding.

It's up to private foundations like the Isabella Santos Foundation (ISF) to raise essential funds for research and new treatment programs that will give the families affected a fighting chance.

OUR PROGRESS

- ✓ **Over \$8M Donated** to Support Our Mission
- ✓ **Hired Top Research Oncologists**
- ✓ **Doubled the Solid Tumor Patient Volume**
- ✓ **Treated Patients Traveling Worldwide** from 24+ Countries
- ✓ **Opened Pediatric Cancer Research Lab** at LCH
- ✓ **12 Clinical Trials** + Rare Cancer Studies Funded

In partnership with Atrium Health Levine Children's Hospital, ISF proudly announced the opening of the Isabella Santos Foundation Rare & Solid Tumor Program in July 2020, bringing world-class comprehensive care, access to the latest clinical trials and an exceptional patient experience to Charlotte, NC.

Our overarching mission is clear – to touch the lives of families battling rare pediatric cancer and significantly accelerate the pace at which life-changing questions are answered.

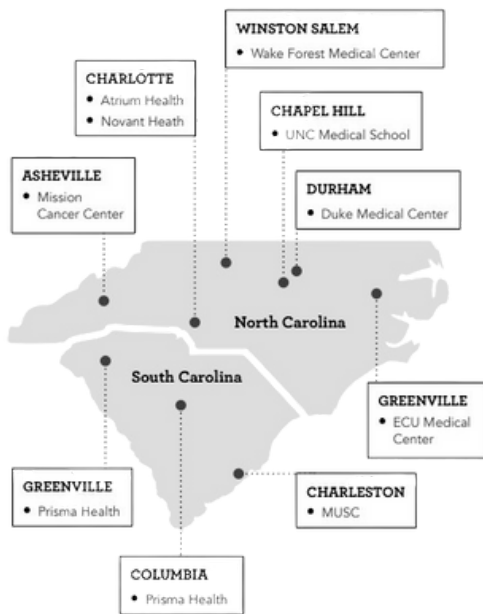

WHAT'S NEXT

With a commitment to becoming a global hub for children with rare cancers, in 2024 ISF is expanding to deliver more cutting edge treatments and compassionate care to young warriors across North and South Carolina with a single mission:
to make a greater impact.

The funding initiatives will range from **basic science and research** to **clinical trials**, to **survivorship and supportive medicine.**

UNITE + FIGHT FOR KIDS WITH RARE CANCER

ISF will expand our impact from 130 children at Levine Children's Hospital in Charlotte to **over 1000 children** spanning the Carolinas.

MAKE HISTORY WITH US BY JOINING A MOVEMENT WHERE GIVING TRULY MATTERS

This is a momentous step towards transforming the landscape of pediatric cancer research and providing hope to countless young lives worldwide.

ISABELLA SANTOS
FOUNDATION

Beat Cancer. Grow Hair. Live My Dreams.

"Much of our research on rare cancers will be done solely using ISF donations for the rare and solid tumor program and we cannot be successful without your partnership. During this exciting time, it is more important than ever to have ISF support the growth of research and clinical operations for the children of Charlotte and beyond because, without that support, we will not be successful."

- Javier Oesterheld MD
Director of Pediatric Hematology,
Oncology & BMT
Levine Children's Hospital

2024 SPONSORSHIP PROGRAMS

ISF offers many opportunities for corporate partners to join our mission, make a positive impact, gain valuable brand exposure, and foster a meaningful company culture.

**SUSTAINING SPONSOR | EVENT SPONSOR | VOLUNTEER
INDUSTRY EXCLUSIVE SUPPORTER | BENEFICIARY PARTNER**

Sponsorship packages are customizable to align with your business's objectives and range from event partnerships, beneficiary programs, community partnerships, corporate sponsors and more.

CHILDHOOD CANCER BY THE NUMBERS

46 children are diagnosed in the U.S. each day	4% of the National Cancer Institute's annual budget	12 major types and 100+ subtypes exist - it's not just one disease
71 average years of life lost to different types	1:5 ratio of diagnosed children who do not survive	2X survivors are twice as likely to suffer chronic health problems
