

ISABELLA SANTOS

FOUNDATION

ENSURING TRANSFORMATIONAL OUTCOMES FOR ALL

The **Torchbearer Legacy Fund** is an exclusive, invite-only collective of private donors committed to investing in our belief that all children should have access to the best treatment and care regardless of where they live.

Complementing and broadening the impactful work achieved by the Isabella Santos Foundation (ISF) over the past 17 years, the TORCH Initiative, along with our Torchbearer Legacy Fund members, will enable groundbreaking, sustained projects. These initiatives will encompass clinical trials, basic science, survivorship support or a home hospital's greatest need.

THE CATALYST

The catalyst for the Torchbearer Legacy Fund was a foundational gift from Jim Ryan, a staunch advocate for the work led by ISF. As chair of the Torchbearer Legacy Fund, Jim's goal is to inspire others to join him in investing in transformational outcomes for children like Isabella, who are navigating the maze of a rare pediatric cancer diagnosis.

"Nothing is more precious than a child, especially watching them grow and become future leaders. The Torchbearer Legacy Fund offers a tangible way to pay it forward, giving children with rare pediatric cancers the opportunity to thrive such that they can be our future heroes as well."

JIM RYAN

INCEPTRA LLC | CHAIRMAN OF THE BOARD,
PRESIDENT AND MANAGING MEMBER

By committing to a minimum \$100,000 multi-year gift, members of the Torchbearer Legacy Fund will allow ISF to build a strong foundation for our expanding mission. This will enable ISF to plan for the continued expansion of our infrastructure and impact, improving both the quantity and quality of life for young rare cancer patients across Charlotte and beyond.
